

# THE MANUAL OF THE ONE-PIECE INTELLIGENT TOILET

# 1 SAFETY PRECAUTIONS

Please read this manual carefully before installation and strictly follow the instructions. After reading, please keep this manual in a prominent place. In order to avoid injury and property damage to users and others, please strictly observe the safety warnings and precautions.

MARNING Indicates that failure to comply with this warning may result in serious injury or death.

A PAY ATTENTION Indicates that personal injury or property damage may be caused if the operation is not carried out in accordance with the provisions of this note.

SIGNS	<b>△ WARNING</b>
8	Lit Cigarettes and other burning objects can not be put into the toilet bowl, otherwise it may cause a fire.
<b>⊘</b> FORBADE	1. Do not disassemble, repair or modify the product on your own, otherwise it may cause fire or electric shock.  2. Do Not pour water or detergent on the body or plug, otherwise it may cause fire or electric shock.  3. Do not use wet hands to plug or pull the plug, or you may get an electric shock.  4. Do not use other electrical appliances in the same socket.  5. Do not use extension cords or loose loose unstable power sockets, which may cause fire or electric shock.  6. If the power cord is damaged, to avoid danger, it must be replaced by the manufacturer, its maintenance de partment or a professional from a similar department.  7. This product is an electrical appliance and should not be exposed to water. Do Not Spray Urine or other liquids on the body.  8. Do not use your fingers or other objects to plug the air outlet or you may get scalded, electrocuted or burned.  9. When the product is energized, do not put the product on its side or upside down, otherwise it may cause fire or burn down.
MUST BE OBEYED	1. Please do not install and use this product in the wet place such as the bathroom.  2. This product must be reliably grounded, if not sure whether it has been reliably grounded, please let a qualified electrician or maintenance personnel check and confirm.  3. Please ensure that the power outlet used by the product complies with the National Standard (zero or so fire), can not be connected to the reverse.  4. This product must be connected to AC220V / 50HZ, load current at least 10A special standard socket and wiring, and socket must, equipped with Earth fault breaker or earth leakage protector or similar high sensitive and fast leakage switch (rated sensitive current below 15mA). The socket position should be installed in the place which is not easy to be dripped by water. It is suggested to use waterproof socket.  The installation should use the new hose assemblies and other attached or specified parts that come with the appliance. The old hose assemblies can not be reused, or they may cause water leakage, fire or electric shock.  6. When the product from the cold or wet place to move indoors, first placed 2 hours, so that the machine fully volatile condensate, and then boot to use, so as not to cause product short circuit.  Please note: When removing sticky labels, soften label with gentle warm heat and remove adhesive residue with label adhesive remover.

SIGNS	<b>△ WARNING</b>
0	Pull out the power plug when there is thunder. Do not place the product where it may fall into or be pulled into the bathtub or sink. Do not place product in water or other liquids. Do not touch products that have fallen into water or are immersed in water. Unplug the power plug immediately. Please do not stand on a ceramic toilet. The ceramic toilet must be fitted with anchor bolts. Do not use water other than tap water, or it may cause skin inflammation and other problems. Please do not let the sun direct irradiation products, so as to avoid product discoloration and affect the remote control reception effect. This product seat and cover has slow down function, please do not press hard, so as not to damage the slow down device. Do not apply force or impact. Do not stand on seat ring, cover or body. Do not place heavy objects. Do not use banana water, gasoline, lotions and detergents, pesticides, toilet cleaners and hard bristles to clean this product. Please stop using and cut off the power supply immediately when the product function is abnormal or malfunction, and contact the service provider in time.
MUST BE OBEYED	When installing, disassembling, repairing and maintaining the product, you must unplug the power plug and close the water supply valve. If the room temperature is below 0°c, the water in the tank must be drained to prevent the tank from cracking. If it is not used for a long time, the power must be cut off and the water in the tank must be drained. People with physical, sensory, intellectual, or experience and lack of common sense (including children) need to use this product under the supervision of a special person. Do not let children play with this product. To prevent damage caused by freezing, please implement warm measures to raise the temperature of the toilet.

# 2 DAILY MAINTENANCE

#### BODY MAINTENANCE

- 1. Please cut off the power when maintaining the body.
- 2. Please wipe the dirty area with a soft cloth wrung out of water.
- 3. Please power on the machine again after wiping. Warm tip: please do not use water to wash the surface of the product.

#### MAINTENANCE of NOZZLE

The dirt on the nozzle, according to the following methods maintenance: 1. When the human body is not seated, press the "hip wash" key or the "child wash / self clean" key of the remote control.

2. Press the host "power" button or the remote control "stop" button to retract the spray Rod.

TIPS: Do not pull the spray rod, so as not to damage the spray rod and motor. The nozzle can be removed and cleaned separately.

## (3) INSTRUCTIONS for REMOTE CONTROL

1) Flush:

Turn on the flush function.

3) Full-automatic/foaming:

Short press is Full-automatic function, long press is foaming function.

2) Open the lid: Turn on or off the toilet lid function.

Open the toilet seat: Turn on and off the toilet seat function.

4) Cleaning position: When the cleaning mode is running, short press the "Nozzle Move Forward/Nozzle Move Back" button on the remote control, the buzzer will beep once for a long time, and the spray bar will move forward/backward by one gear. A total of 5 levels are adjustable.

Women's cleaning and children's cleaning:

The short press is for women's cleaning, and the long press is for children's 7) Buttocks
washing and
children's
wash.:

The short press is for buttocks washing, and the long press is for children's washing.

5) Massage:

The wash water temperature alternates rhythmically between the water temperature in the setting file and the water temperature in the normal temperature file (not responding in automatic operation mode).

8) Water temperature:
Adjust the water temperature, the water
temperature is divided
into 1 level (34°C), 2
levels (37°C), 3 levels
(40°C).

10) Seat temperature:. Adjust the seat temperature, the seat temperature is divided into 1 level (34°C), 2 level (37°C), 3 level (40°C).

12) Cleaning power:

According to the remote control cleaning intensity button, it can be divided into level 1, level 2, level 3, level 4, and level 5.

13) Stop / dry:

When the human body is seated, short press is to dry, short press again to stop drying, and short press to stop when other cleaning functions are turned on.

9) Wind temperature:

To adjust the air temperature, the buttons are divided into 1 gear  $(41^{\circ}\text{C})$ , 2 gears  $(46^{\circ}\text{C})$ , 3 gears  $(50^{\circ}\text{C})$  below  $55^{\circ}\text{C}$ .

14) Night light:

Turn the night light on and off  $\cdot$ 

11) Energy saving mode:

1. In the power-on state, short press the "energy saving" button on the remote control, the buzzer will beep for a long time, the power saving function will be activated, and the icon will light up.

2. Energy-saving operation: If the seat ring is heated at a very high temperature, turn off the heating function. If the seat ring is heated at a normal temperature, the seat temperature will remain at a normal temperature. Under energy-saving operation, the water temperature, seat temperature, and wind temperature are displayed according to the current settings.

3. In the energy-saving state, the human body is seated and the energy-saving operation is not performed; in the energy-saving state, the human body leaves the seat and continues to perform the energy-saving operation.

### 4 Operating instructions for knobs

Forward KNOB (counter-clockwise rotation) → SELF-CLEANING → FEMALE MOBILE CLEANING FOR 2 minutes → drying for 3 minutes → stop, female fixed cleaning again counter-clockwise rotation for female fully automatic mobile cleaning, fEMALE MOBILE CLEANING AGAIN COUNTER-CLOCKWISE rotation for the female fully automatic fixed cleaning.

Drying stop: In other functional states, press the button to stop the function. In other states, press the button to dry the function. When the cover plate is cut off, the hand press the cover plate Knob to flush the water with the function of power off.

Forward KNOB (clockwise rotation) → self-cleaning → hip moving cleaning for 2 minutes → drying for 3 minutes → stop, hip fixed cleaning again clockwise rotation for the hip full automatic moving cleaning, when the buttock moves cleanses, rotates clockwise once more for the buttock full automatic fixed cleanses.

Status: Use Buttocks, children, hot and cold massage, fully automatic function for the blue, use for women when purple, when drying for red. People seated for the green often light, people seated for the white often light.

Manual flush function When the person is not seated, press the KNOB for flushing function.

**Power switch** When the person is not seated, press the 5-second button to stop the power switch for the toilet, repeat the operation can turn on the power (toilet power, switch when the display, knob, lighting, knob lights, microwave signal, foot signal to go out).

Strength Adjustment of clamshell When a person is not seated, press the 5-second Knob to stop the power supply. Within 3 seconds, press the flip button on the remote control, and the display will pop up to adjust the flip gear, then press the remote control on the cleaning force (a total of 11 files can be adjusted cycle of force) plus + to increase the force, minus-to reduce the force, after adjusting a long 5-second button to stop the power can be set successfully.

Turn-over adjustment When a person is not seated, press the 5-second Knob to stop the power supply. Within 3 seconds, press the turn-over button on the remote control. The display will pop up to adjust the turn-over gear, then press the remote control on the cleaning force (a total of 11 files can be adjusted cycle of force) plus + to increase the force, minus-to reduce the force, after adjusting a long 5-second button to stop the power can be set successfully.

MOISTENING function Once seated, it detected that the human body's seated signal turned on the moistening wall function (turn on the upper flush for 2 seconds). The knob rotated in the direction of the female cleaning. After 5 seconds, it let go and then pressed the flush button on the remote control within 2 seconds, can Be turned on or off the toilet wall function. (after the seat from the seat less than or equal to 10 seconds of non-wetting wall, more than 10 seconds to re-wetting wall), wetting function time 2 seconds.

## 5 Handling of frequently asked questions

	reason	Deal with	
	Blockage caused by bending of intake hose;	Eliminate the bending of the intake hose;	
No squirting	Inlet Valve closed;	Open the intake valve;	
	Tap Water, no water	Waiting for water	
	Partial blockage due to bending of intake hose;	The drain hose bends;	
Weak spouting	Intake valve not fully open;	Fully open the inlet valve;	
	Clogged Inlet strainer	Clean the inlet filter	
The water is	Water temperature set to room temperature;	Reset the water temperature gear;	
not hot	In standby or power-saving mode	Switch to function mode and spray after 2 minutes	
Seat temperature	Set the seat temperature to normal;	Reset the setting temperature;	
is not hot	In standby mode	Switch to function mode and spray after 2 minutes	
The wind is not hot	Set the air temperature to room temperature	Reset the wind temperature gear	
No Wind	In standby or power-saving mode	Switch to function mode to use the drying function	
Spray Rod not	Power cut;	Gently push the spray rod back and wait for incoming power;	
retracted	Stuck in a foreign object	removal	
The boom doesn't	Power cut;	Waiting for the call;	
extend out	Not Seated in the seat sensing area	Sit in the correct position. Sit in the sensing area	
The remote doesn't show	Remote control battery positive and negative charge or low battery	Reload the battery and align the anode and cathode; Replace with a new battery	
Pay Attention	If the failure is not eliminated after handling according to the above method, the power should be cut off, contact the service provider, please professional maintenance. If the power leakage protection switch often jumps off, that the product has leakage, please cut off the power supply, contact the service provider, please professional maintenance.		

# 6 Other functions

Spray rod self-cleaning function The self-cleaning function will be opened at the beginning and the end of the cleaning (for the purpose of self-cleaning the spray rod and replacing the cold water in the pipe).

Automatic drop cover function 2 minutes after the person leaves the seat, the cover is automatically closed. When there is a microwave signal, when the microwave detects the signal of someone, the cover closing time will be automatically refreshed.

Memory program Water temperature, seat temperature, wind temperature, remote control setting gear before power off memory, spray rod shift memory last operation position.

#### Provision of water and electricity

- 1. Open the Angle valve for water and check the tightness of the threaded joint to ensure no water leakage.
- 2. Power cord leakage protection plug is inserted into the power socket, press the reset switch, the plug indicator light is on, indicating power on (press the leakage test button before the first use, and the protection switch pops up, indicating normal leakage protection function)
- 3. When the cover plate is powered on, the spray rod is extended and then returns, while spraying water from the clean mouth; when it returns to the position, the self-clean mouth stops spraying water, the floodlight is on during the reset process, and the floodlight is off after the reset (no flushing during the reset).

# 8 Technical indicators

The main machine	Rated Voltage Rated power Maximum power Water pressure range Power Cord Water consumption Heating Power	AC 220V/50HZ  1030W  1670W / 1270W (auto-flip / slow-drop cover)  The minimum essential water pressure is 0.07 MPA (20L / Min flow rate) and the maximum water pressure is 0.8 MPA (hydrostatic pressure)  It's about 1.5 meters long  5L
machine	Maximum power Water pressure range Power Cord Water consumption Heating Power	1670W / 1270W (auto-flip / slow-drop cover)  The minimum essential water pressure is 0.07 MPA (20L / Min flow rate) and the maximum water pressure is 0.8 MPA (hydrostatic pressure)  It's about 1.5 meters long
machine	Water pressure range Power Cord Water consumption Heating Power	The minimum essential water pressure is 0.07 MPA (20L / Min flow rate) and the maximum water pressure is 0.8 MPA (hydrostatic pressure)  It's about 1.5 meters long
