PACKING LIST

	10mm glass panel		
	Glass to wall hinges		
	Bubble seal		SUPPLIED UNCUT (2 PIECE)

FITTING INSTRUCTIONS

		<p>step 1 Fit supplied hinges to the glass panel. Ensure hinges are tightened sufficiently</p>
		<p>step 2 Raise panel by approx 5mm from base and support with blocks under the panel. (blocks not supplied) Position panel against wall with hinges in closed position and use level to ensure the panel is vertical. Mark all screw hole positions on the wall.</p>
		<p>step 3 Remove panel and install suitable wall fixings to the marked screw holes (wall fixings not supplied). It maybe advised to only drill 1-2 holes before final fixing to ensure panel has been installed correctly. Secure the panel and hinges to the installed wall fixings.</p>
		<p>step 4 Fit supplied seals to the screen. please note that seals are supplied longer than required and will need cutting to length. The wall side seals will need cutting to length and fitting close to the hinge.</p>

Suggested seal fitment for the corner..

Handy videos

Adjustment of hinges if required.
