- Periodically clean the nozzles to remove any lime scale as shown in Illustration "a".

In order to maintain the quality of products, surfaces must be cleaned exclusively using soapy water and dried with a soft cloth. Never use detergents, powders or creams containing alcohol, acid, bleach, solvents, chemical agents, metal or abrasive sponges, etc. Water contains limestone in variable quantity, which can remain on the surfaces leaving spots and forming deposits.

In order to avoid limestone deposits clean and dry the product immediately after use. It is possible to prevent limestone deposits on nozzles by regularly rubbing with a damp cloth.
